How to determine if your vehicle is SmartWay Elite

2. Select the correct drop down option for your vehicle’s year, state, class and make. Then click the search button.

3. Find your vehicle in the list that appears after you click search and select the link for the correct model.

4. The page that appears will have several tabs across the top. It defaults to the Fuel Economy tab, so click the one for Energy and Environment that you see highlighted blue below.
5. As you scroll down, under the EPA Smog Rating section, be sure Maryland is selected in the drop down menu, and then view the icon to the right of it. The example below is Certified SmartWay, but not SmartWay Elite; this vehicle does not qualify for the Low Emission Vehicle discount.

6. Qualifying vehicles will display the following, showing Elite just below the SmaWay distinction.
